

- Completing all major field and related work requirements in residence is strongly recommended.
- Always consult with your advisor to prepare a schedule that best fits your needs.
- All related work for the major, prerequisite accounting and economics courses, and the general education requirements should be completed by the close of the sophomore year.
- No 300-level accounting, business, or economics courses may be taken in the freshman or sophomore year.
- No 200-level accounting, business, or economics courses may be taken in the freshman year.
- If you are planning on doing an internship in your senior year, plan ahead to be sure you can finish all your required course work. BUS 319, Career Preparation, 1 s.h. is highly recommended before doing an internship.
- If you are planning on declaring a minor in any subject matter, consult with your advisor about the use of required courses in the minor which may also fulfill your free elective areas.
- Retention in the major: Students must maintain a minimum GPA of 2.0 in the major. Students may be dropped from the major if they do not have a minimum 2.0 GPA in the major.
- ACCOUNTING MAJOR: New York State Education and Licensure Requirements in Public Accountancy mandate that on or after August 1, 2004, to be registered as a program recognized as leading to licensure in public accounting, the program must ensure completion of 150 hours. Individuals who apply for licensure in certified public accountancy on or after August 1, 2009, must complete a registered 150-hour program or the equivalent. Students should consult with their academic advisor, the Division of Economics & Business, or Academic Advisement Center about how program re-registration might affect time to graduation and fulfillment of New York State licensure requirements.
